

HOW TO PURCHASE LIGHTLAB SCIENCE SUPPLIES?

Most of the supplies can be found in your home, the local hardware and stationary stores. They are listed on page ix of the book. You will however need to find some of the supplies from a Science Store.

We researched online Science stores for these items, and selected supplies suitable for our needs from a few vendors. Lightlabetc carries a limited supply of kits that are sold to our clients with the purchase of book only. If you wish to purchase from us, here is the list of items that are in our package, available at

[Lightlab Products and Services](#)

#	Lightlab Science Supplies	Needed for Chapters
